11 Divisions ¹¹		39 regiments	302 ICBMs ¹² 46 SS-18 0 SS-19	

¹ Russia's Defense Ministry reported in December 2019 that a "ceremony of interception on combat duty of the first regiment" has had taken place. "The first regiment of the Yars PGRK in the Altai Territory took up combat duty." Press Release, Russian Ministry of Defense, December 16, 2019, https://structure.mil.ru/structure/forces/strategic_rocket/news/more.htm. It is still too early for "combat duty," but upgrade equipment had arrived at the supply base by early-October 2019 and equipment at the 479th regiment garrison by December 2019.

² The 3 active regiments are the 368th, 494th, and 767th regiments. It is possible that a 4th regiment (175th) is also active, in which case the total number of deployed SS-18s would be 52.

³ Two SS-19 Mod 4 (Avangard) hypersonic glide vehicle ICBMs were installed by the end of 2019, the first in one of two regiments with a total of 12 missiles to be operational by 2027.

⁴ It is possible that one SS-19 regiment is still active at Kozelsk (214th Missile Regiment) but that the missiles have been withdrawn from the silos.

⁵ Construction of the second SS-27 Mod 2 (RS-24) garrison at Novosibirsk started in mid-2016.

⁶ It is possible (but unconfirmed) that this unit is based at temporary open-air while permanent location Novosibirsk 5 is upgraded.

⁷ Former 773rd GMR site. Unit moved to Teykovo. TEL garages have been demolished but building material possibly for an upgrade has been brought in, and the garrison is populated.

⁸ Described by Russian Defense Ministry as Yars-S.

⁹ It is possible that one or two SS-19 regiments are active, but status is unknown.

¹⁰ During 2019, "preparatory work" began for upgrading to SS-27 Mod 2 (RS-24).

¹¹ A 12th division at Yurya has one SS-25 regiment that does not carry warheads but serves as a back-up ICBM launch code transmitter.

¹² Upgrading regiments sometimes go on experimental combat alert with only a few launchers ready.
