¹ RMOD reported in Dec 2019 that a “ceremony of interception on combat duty of the first regiment” had taken place.

² It is possible that the 175th Missile Regiment (51.2708, 60.2992) is also active, but it is not thought to be armed. The unit is a potential candidate for the second SS-19 Mod 4 regiment.

³ A total of 12 silos (two regiments) are planned to be operational by 2027.

⁴ The 328th regiment is based at this temporary open-air location until its permanent garrison (55.3181, 83.1676) is completed.

⁵ Described by Russian Ministry of Defense as Yars-S.

⁶ It is possible that one or two SS-19 regiments are active, but they are not thought to be armed. They are potential candidates for upgrade to the SS-19 Mod 4 (Avangard) in the future.

⁷ The 62nd MD at Uzhur is scheduled to receive the SS-29 (Sarmat) in the near future. Some former SS-18 silos will also be converted to the SS-19 Mod 4 (Avangard).

⁸ During 2019, “preparatory work” began for upgrading to SS-27 Mod 2 (RS-24).

⁹ It is potentially possible that the 290th regiment will move south to the new garrison (56.5658, 48.4515) that is under construction closer to the supply base and other garrisons of the division.

¹⁰ The 779 MR garrison is being rebuilt. Until completion, the launchers and support vehicles are temporarily based near the supply base (56.5587, 48.0558).

11 Divisions¹¹		39 regiments	310 ICBMs¹²	
<p>GMD = Guards Missile Division; GMR = Guards Missile Regiment; MD = Missile Division; MR = Missile Regiment; TEL = Transporter Erector Launcher. * Uses US/NATO missile designations. SS-18 (RS-20V), SS-19 (RS-18), SS-25 (Topol), SS-27 Mod 1 (Topol-M), SS-27 Mod 2 (RS-24).</p>				

¹¹ A 12th division at Yurya has one SS-25 regiment that does not carry warheads but serves as a back-up ICBM launch code transmitter.

¹² Upgrading regiments sometimes go on experimental combat alert with only a few launchers ready.
